

M & R Feeds Corn Silage Day

Bring 4-5 plants to our Corn Silage Day (At least 10 rows in from Headlands) & we'll evaluate moisture + optimal harvest time for you! Drop off when convenient, or stay for the BBQ!

Results back the next day.

SEPTEMBER 11th

10am-3pm

<BBQ @ 12pm>

Harvesting too wet and too dry impairs our corn silage

| Moisture | Yield (T/A) | Moisture (%) | CP (%) | NDF (%) | Starch (%) | Milk/ton (lbs/ton) | Milk/acre (lbs/acre) |
|-------------------|-------------|--------------|--------|---------|------------|--------------------|----------------------|
| Too wet (>70%) | 7.3 | 71 | 7.3 | 50 | 26 | 3,040 | 22,300 |
| Ideal (60 to 70%) | 8.1 | 65 | 7 | 47 | 30 | 3,180 | 25,900 |
| Too dry (<60%) | 8.7 | 57 | 6.9 | 44 | 34 | 3,110 | 27,000 |
