

PURINA® CREEP FEEDS

PRODUCT PURPOSE

Purina's Creep Feeds are a palatable complete feed fortified with the essential minerals and vitamins needed for optimal calf growth. Its balance of protein and energy optimizes frame development and good lean muscle gain to ensure proper weight gain of beef calves on pasture. It helps to maximize weaning weight while allowing the brood cow to maintain a better body condition for improved reproductive performance.

FEATURES

- Pelleted form.
- Free-choice creep feed that contains optimal levels of protein and energy.
- Fortified with essential minerals and vitamins.
- Available in bulk with different feed additives.

PRODUCT BENEFITS

- Improves average daily gain of pasture cattle.
- Provides the deficient nutrients not supplied to the growing calf through the consumption of milk and forages.
- Increases frame development and lean muscle gain.
- Increases weaning weight.
- Maintains the brood cow's body condition and enhances reproductive efficiency.
- Enhances nutrient utilization of entire diet.
- Improves the animal's immune system.
- Highly palatable for consistent intake.
- Extends pasture season.
- Prevents separation of ingredients with this uniform product.
- Increases carrying capacity of a pasture.

PURINA® CREEP FEEDS

GUARANTEED ANALYSIS

AA CREEP - 3018

Code 3018

Crude Protein	16.00%
Crude Fat	3.50%
Crude Fibre	15.00%
Calcium	0.50%
Phosphorus	0.30%
Sodium	0.20%
Vitamin A	9,500 IU/kg
Vitamin D3	2,850 IU/kg
Vitamin E	15 IU/kg
Selenium	0.3 mg/kg

AAA CREEP FEED - 3010

Code 3010

Crude Protein	16.00%
Crude Fat	3.50%
Crude Fibre	15.00%
Calcium	0.50%
Phosphorus	0.30%
Sodium	0.20%
Vitamin A	10,000 IU/kg
Vitamin D3	3,000 IU/kg
Vitamin E	40 IU/kg
Selenium	0.3 mg/kg

FEEDING DIRECTIONS

1. Purina®'s CREEP FEEDS should be offered to beef calves on a free choice, continuous basis when pasture quality begins to decline, approximately 50 to 80 days pre-weaning.
2. Calves should consume CREEP FEEDS at a daily rate of 1% of body weight. Never allow creep feeders to run out of feed.

MANAGEMENT TIPS

- Locate near water, mineral or primary grazing areas.
- Introduce when pasture quality is declining.
- Keep dry and fresh for consistent palatability.
- Never allow creep feeders to run out of product.
- Frequently check feeders to monitor consumption.
